It’s time to fall in love with puppetry again!

Our spring season welcomes stage adaptations of award-winning, best-selling children’s books and classic literature, a critically-acclaimed adult puppet performance, and new experimental works for adults. In addition to our performance offerings, the Center invites you to immerse yourself in our new museum programming, workshops, and special events this spring. For all of our activities at the Center, we continue to focus on your safety and well-being with our newly updated HVAC systems with ionization in our mainstage theater, frequent cleanings, and the requirement of masks by all employees.

Our Family Series in-person performances continue with *The Snowy Day and Other Stories*, *Click, Clack, Moo: Cows that Type*, *Pete the Cat*, and *The Wizard of Oz*. This celebration of children’s literature is sure to engage young audiences and their families.

STEM Adventure Days are back this season! Join us for an afternoon of STEM magic with a puppet show, a special Museum tour, a customized Create-A-Puppet Workshop™, with an added post-show presentation that connects programming throughout the Center with STEM-based curriculum.

If distance limits your ability to visit the Center in person, we are happy to come to your classroom or your living room with our in-person or virtual outreach programming. In addition to our classroom virtual programming, our Online Puppet Playdates will be offered every third Saturday of the month to families in the comfort of their homes. These Playdates provide a unique experience beyond the screen, with interactive play and puppet-building opportunities. Make sure to follow us on your favorite social channels to see the latest. We hope to see you soon!

The Center for Puppetry Arts’ award-winning Digital Learning team has become an essential teaching tool for many. With more than 20+ years in the field of distance learning, the team offers a huge variety of purpose-built, interactive, curriculum-based programming.

Now in all 50 states and nearly 90 countries, the Digital Learning team is expanding its reach and its programming.
Curriculum-Based Workshops

Our workshops are live, dynamic, and completely interactive. We will provide you with a study guide and list of puppet-making materials to ensure your workshop is educational and entertaining. We offer curriculum-based workshops on a wide range of topics. Below are just a few examples of the many digital workshops that are available. These workshops are available on demand. Book whenever it’s convenient for you and your group.

Anansi the Spider: A West African Folktale

Learn about trickster tales and the origin of Anansi the Spider. In this hands-on interactive lesson, students use pictures, movement, and music to retell the story of Anansi the Spider by Gerald McDermont. Students watch the African folktale Anansi and Sister Mud Turtle come to life with a shadow puppet show performed by Center staff. Students then compare “food cousins” from West Africa and the U.S. The workshop culminates with a puppet-making activity where students make an Anansi puppet of their very own.

Butterflies

Learn about the lifecycle of the butterfly, what makes a butterfly an insect, and its coloring and camouflage through this interactive Video Conference. Participants will learn while making their very own butterfly rod puppet. Photographs of the different stages in the life of a butterfly are included. This is a great arts and science lesson all in one! Modified puppet design available for Pre-K.

Tropical Rainforest

Students participate in learning activities about the location of tropical rainforests, their relationship to the equator and tropic lines, various animals found in the rainforest and the different layers/strata. The roles of birds in the South American rainforest will be discussed as well.

Students will construct a flying Tropical Bird Rod Puppet.
Live, Interactive Puppet Shows

We offer a variety of live, interactive puppet shows. From the classics to original works, these performances are custom-created to engage, entertain, and educate. Below are a few examples. These puppet shows are available on demand, book whenever it’s convenient for you and your group.

Interactive Puppet Show
Aesop’s Fantastical Fables!

Set in Ancient Greece, Aesop’s Fantastical Fables! will tell the story of a servant Aesop and his sidekick Cecil the Lion who share with the audience the stories Aesop has created, using puppets. Aesop tells three classic tales, The Lion and the Mouse, The Boy who cried Wolf and The Tortoise and the Hare, encouraging the audience to participate in this very interactive puppet show.

Interactive Puppet Show
Mr. Kolache’s Long List

Join Mr. Kolache (hand puppet), a Czech pastry, and his dog Baklava (hand puppet) on a “movin and groovin’” adventure both inside and outside the grocery store in which they live. When Mr. Kolache is faced with an overwhelming list of tasks and lack of energy, students (K-2) come to his assistance by helping him make choices about eating healthy snacks and staying active.

“My kids did not know what to expect and they were absolutely TRANSFIXED the whole time!!”
Online Puppet Playdates

On every third Saturday, the Center’s Digital Learning team will be presenting online, interactive puppet shows and workshops for individuals and families. Our digital programming is not just for groups anymore!
